LINXS TRAINING INSTITUTE OF LA: COST MANAGEMENT WORKSHOP

As part of the ongoing Mentor-Protégé Program, LAX Integrated Express Solutions (LINXS) Constructors invites you to attend the next LINXS Training Institute of LA Workshop. This presentation will include information on how businesses can best manage their cost, contracts and billings, and will expand on how to interact with general contractors in order to ensure timely and maximum compensation. The session will feature two guest speakers:

Erica Eddy is the Lead Cost Engineer for LINXS Constructors at the Automated People Mover (APM) project and has been in the construction industry since 2009. In the past ten years, Erica has worked on multiple \$1B + projects. During this time, she has mainly focused on project controls, working closely with vendors to manage their contracts and payment as well as cost management for the general contractor. She graduated from the University of California, Irvine with a B.S. in Civil Engineering.

Sneh Kishan is a Field Engineer with LINXS Constructors within the Civil discipline. He earned his Master's in Construction Engineering from the University of Southern California. Sneh has been in the construction industry for four years and has worked on three mega design build projects in the Los Angeles area during that time.

WHEN

Thursday, November 21

1:30 - 3:30PM

WHERE

LINXS Office

5901 W. Century Blvd., 2nd Floor

Los Angeles, CA 90045

*Parking is not hosted (\$16 max/day rate)

RSVP HERE

LINXS will be hosting more workshops before the end of the year on a variety of other construction business related topics. These workshops are a part of the LINXS Training Institute of LA, an eight-track program overseen by the LINXS Inclusivity Team designed to engage and train certified businesses, community representatives, local workers, disadvantaged workers, underrepresented workers, youth and college faculty. All firms are invited to attend these upcoming workshops, so please keep an eye out for email invitations!

If you have any questions, please contact opportunities@linxscjv.com. We look forward to seeing you there!

Thank you for your interest,

The LINXS Inclusivity/Certified Firms Outreach Team

ABOUT THE PROJECT

The Automated People Mover (APM) system will bring convenience and time-certainty for guests traveling to or from LAX. During peak hours, driverless trains will arrive at stations every two minutes. The trains will have wide doors for easy access with luggage, large windows for viewing, plenty of hand holds and seats for those in need. Station platforms are open-air, light-filled and have escalators and elevators for quick, convenient access to the terminals. The APM is the centerpiece of LAX's Landside Access Modernization Program (LAMP), which also includes a Consolidated Rent-A-Car (ConRAC) facility, Intermodal Transportation Facilities and associated roadway improvements. The APM will reduce vehicle congestion in the Central Terminal Area, provide a connection with L.A. Metro's regional transportation system, create new locations for passenger pick-up and drop-off, reduce emissions and provide reliable access to the terminals.
